Re: Response to Review Request **No. 165-16819-00001**
ESP replacement's on Cayuga Gen. Sta. Units 1, 2
Plant ID: 165-00001

Dear Mr. Pearl:

Cinergy Power Generation Services, LLC, (Cinergy) submitted a review request on November 26, 2002 concerning the Cayuga Generating Station located at State Road 63, Cayuga, Indiana. The letter was submitted to determine if the Cayuga Generating Station requires an air pollution permit for operations consisting of the replacement of the electrostatic precipitators (ESP's) currently installed and servicing units 1 and 2. Cinergy has stated the replacement project is solely for pollution control purposes that will enhance the particulate removal efficiency and reliability.

Pursuant to 326 IAC 2-2-1(x), the ESP replacement pollution control project, as described in the review request, is exempt from the air permit requirements of 326 IAC 2-2, "Prevention of Significant Deterioration (PSD) Requirements" since the physical change would not result in a significant net emissions increase. Additionally, pursuant to 326 IAC 2-1.1, the ESP replacement pollution control project, as described in the review request, is exempt from the requirement to have a registration or permit under this article since the change would not result in an increase in emissions. This existing source has submitted their Part 70 application (T 165-7174-00001). In order to update the Part 70 application, a brief description of the new pollution control equipment may be required.

Questions should be directed to Patrick Burton, OAQ, 100 North Senate Avenue, P.O. Box 6015, Indianapolis, Indiana, 46206-6015, or call (800) 451-6027, press 0 and ask for Patrick Burton or extension (2-8412), or dial (317) 232-8412

Sincerely,
Original signed by Paul Dubenetzky
